Greatest Strengths - What can I do for you?

Teamwork
Years of experience as part of a team has taught me the importance of every role in a team, and how to work together and efficiently.

Leadership
Being a class representative, residential life ambassador, and former school ambassador has taught me vital leadership skills and how to communicate ideas clearly.

Flexibility
Being based in London means I'm able to travel or relocate across the UK and beyond. My hotel environment accustomed me to overtime and atypical, flexible hours, and long commute times.

Adaptability
I thrive under pressure in high volume hotels and restaurants, and apply this to my daily life to confidently address issues and tasks and find solutions to them.

About Me

I'm a self-taught creative with a strong background in coding, animation, video editing, and marketing. Passionate about problem-solving and storytelling, I create games that fuse creativity with technical skill. Experienced with Unreal Engine 5, Unity, Blender, C# and the Adobe Creative Suite, I aim to push the boundaries of interactive storytelling through innovative design.
